

SPEEL PRAHA to Exhibit at Singapore Airshow 2026

Czech avionics specialist SPEEL PRAHA will present its solutions at Singapore Airshow 2026, exhibiting as part of the Czech Pavilion at Stand C-T87 from 3 to 6 February 2026.

With more than 30 years of experience in the development and production of certified avionics systems, SPEEL PRAHA will showcase its innovation-driven avionics solutions with a personal touch, focusing primarily on Head-Up Displays (HUD) and Crash-Protected Voice and Flight Data Recorders (CVFDR).

While SPEEL PRAHA is currently deeply involved in the L-39 Skyfox programme, its products and engineering capabilities are not limited to a single platform. The company's avionics solutions are designed with a strong emphasis on customisation and integration, making them applicable across a wide range of aircraft categories.

“Although the L-39 Skyfox is our key programme today, our products are designed to be adaptable to many other platforms. We see strong potential not only in manned aircraft, but also in reusable UAVs, where our experience in certified aviation electronics can bring significant added value,”

says Pavel Valina, Sales Manager at SPEEL PRAHA.

At Singapore Airshow, SPEEL PRAHA aims to engage primarily with air forces, manufacturers of trainer and light combat aircraft, maintenance, repair and overhaul (MRO) organisations, as well as manufacturers of reusable UAV systems seeking reliable avionics partners with in-house design and manufacturing capabilities.

“Singapore Airshow represents an important opportunity for us to build personal relationships in a region where our presence has so far been limited, with the exception of the Vietnamese Air Force’s L-39 Skyfox fleet. At the same time, it allows us to clearly demonstrate that we are an integral part of the Czech aerospace industry,”

adds Petr Vidiečan, R&D Director at SPEEL PRAHA.

SPEEL PRAHA remains open to cooperation beyond its traditional comfort zone, including joint development projects and tailored avionics solutions for new platforms and applications.

Visitors are invited to meet the SPEEL PRAHA team at Stand C-T87, Czech Pavilion, during Singapore Airshow 2026.

About SPEEL PRAHA

SPEEL PRAHA s.r.o. is a Czech engineering company with more than 30 years of experience in the development of advanced avionics and onboard data recording systems for aircraft and helicopters. Founded by specialists originating from the Aeronautical Research and Test Institute (VZLÚ), the company builds on a strong tradition of rigorous testing, certified engineering, and practical innovation. SPEEL designs, manufactures, and integrates complete, tailor-made recording and analysis solutions for customers worldwide.
